Planning application: Forres, Orley Farm Road, Harrow. Ref: P/5425/18

Dear Kimry Schlacter

The Harrow Hill Trust Planning Committee has considered this application.

The application shows an inverted L shaped brickwork elevation with a black stained timber cladding panel continuing to the house with a gate. It is a peculiar design which does nothing to enhance or preserve the character of the conservation area.

The lightweight cladding appears to support the heavy brick wall above. It seems overly contrived and unnecessary. The planning committee believes something more traditional, as in the previous scheme, would be more appropriate, and in keeping with the house and the area.

Kind regards,

Dr Simon Less

Chair, Harrow Hill Trust Planning Committee
