Planning application: P/2890/19, P/2947/19 – SRM Works, West Street, Harrow on the Hill

Dear Ben Schnell

The Harrow Hill Trust Planning Committee has considered this application.

We are concerned about the removal of the rear terracotta window surrounds and windows and their replacement.

Whilst we appreciate the desire for access to the rear garden and openness of the living space, we are unsure that the proposal for precast concrete surrounds and replacement windows and doors sits well with the listed building.

The new intervention completely changes the proportions and feel of the rear elevation and we feel that a more sympathetic solution could be found by retaining some of the proportions and thickness of the mullions.

Otherwise we welcome the repair works to this important building.

Kind regards,

Dr Simon Less

Chair, Harrow Hill Trust Planning Committee
