Planning application: P/3434/19 – 36 Roxborough Park

Dear Aadil Essa

The Harrow Hill Trust Planning Committee has considered this application and has the following comments.

The property has previously had an 8-metre side return extension. The proposal is for a further 6 metres to be added to the rear at ground floor and a further 3 metres at first floor level. This means that the side return extension would be 12 metres from the rear wall of the original house. This is excessive.

The 3-metre first floor extension would further elongate the already long rear projection. This would impact on the adjacent properties by adding bulk and length. The 3-metre first floor projection would encroach on the 45 degree line from No. 34.

In addition:

- The side elevation has the roof drawn incorrectly as the ridge height beyond the first floor extension is too low.
- The straight joints in the brickwork where the building is extended will be difficult to construct without a visible junction.

The proposal represents over development, excessive length and is out of proportion. It also makes for a very dull extended architectural solution. Going beyond permitted development dimensions is a bad precedent for the conservation area. We consider the application should be refused.

Kind regards,

A handwritten signature in black ink, appearing to read 'S. Less', with a horizontal line underneath.

Dr Simon Less

Chair, Harrow Hill Trust Planning Committee
