RE: P/5002/21 Power House,

30th January 2022

Dear Sissi Yang

This remains overdevelopment of the site, it still has limited external views from within the property due to the reliance on roof lights and views restricted by the surrounding parapet wall. The proposed dormer is visible from the public domain, and it overlooks the neighbours albeit at an angle. The dormer is not complementary to the industrial heritage of the building. The use of a roof terrace would create further overlooking and potential noise and possible light pollution impacting on the neighbour's amenity, the public's amenity, the conservation area and wildlife in the area.

Yours sincerely

Paul Catherall
